A hot topic for Upper Primary students looking at important environmental issues. This attractive series outlines our dwindling natural resources and examines the pressures on natural and man-made systems. It looks at the causes of the most significant environmental problems faced by Australians today and then focuses on solutions, both on a large and small scale. Colour photographs, technology boxes, maps and glossaries are included. Each book covers a key issue and gives readers answers to difficult questions.

Features of this book include:

- Informative and comprehensive text with contemporary photographs
- Case studies
- Relevant maps and labelled diagrams
- A resource list for further information
- A detailed glossary that explains new and difficult words and concepts
- An index.
